All slim bin modular units will require an ice storage bin, see page 58.

## Technical

- Voltage 240V – single phase
- All models 13 amp
- 1 to 5 bar operating water pressure
- Optimum production is achieved at ambient and water supply temperatures of 21°C and 10°C
- Ambient and water supply temperature will affect ice production capacity

To produce ice of good quality all ice machines must be supplied with suitably softened and filtered water. Any filters and softeners must be of sufficient capacity and correctly maintained.

<sup>#</sup> Height of drain is for modular unit only, add height of bin for overall height.

<sup>##</sup> When in ice production mode.

<sup>\*\*</sup> The amps rating is required as during the harvest cycle the unit draws a higher current, failure to fuse correctly may result in equipment failing to work correctly.

See page 63 for ancillary items.

Suitable for Maidaïd® SLIM production units only – see page 57.
